

**Position Statement - 2017 INCOSE CMC
Treasurer Nomination - J P Lötter**

I have served on the CMC for the last four years. During the first two years as Membership Officer, I have implemented a membership database to simplify the management and improve the accuracy of membership information. This database is still in use and also utilised to manage conference registrations. As Treasurer I have acquired a better understanding of the needs related to financial reporting and am currently implementing a similar database to simply the capturing and presenting of accurate financial information. If elected as Treasurer, I plan to complete the financial database for future use.

The 2017 CMC will have a new President and President Elect, and I believe that it is important that a few of the current experienced members should remain to support the new executive. This is the main reason why I accepted the nomination.

I will continue to attend to the duties of treasurer and as member of the management committee in a similar manner as done in the previous years in support achieve the goals of the chapter.

J P Lötter

CV for J P Lötter

Cobus Lötter began his career as an engineer in training at the Department of Water Affairs on completion of national service in the SA Navy. After a short stint at an engineering consulting firm, he joined Armscor in 1989.

Initially he was involved in air defence systems, optical & laser technology development and later various electro-mechanised systems, before becoming the project manager for the development of an artillery target engagement system. His last responsibility as project manager was the acquisition of a tactical intelligence system for the SA Army.

Recently he changed focus from project management to systems engineering and are now involved in engineering support to acquisition projects; and in the development of acquisition processes and support systems.

Cobus holds a B Eng (Mech) degree from the University of Stellenbosch and has completed a certificate in project management at the University of Pretoria.
